@Kirandeep: Thanks for pointing out this silly mistake. It worked. Learnt a lesson that you need to work on such things with a fresh mind and not when sleepy.:). By the way I also want to point to others that after entering the Server and Database name under My SQL database, I got another window pop-up asking for my user authentication. I then choose the Database option in the Navigation menu and entered the user name and password as root. I was able to import the data after that. Sorry I could not capture the snippet. Hence could not post here.

@VS @Kirandeep: Thanks for pointing out this silly mistake. It worked. Learnt a lesson that you need to work on such things with a fresh mind and

Kirandeep 06/21/2022 10:54 AM

@VS glad that it helped and thanks for the detailed message and this will help other to figure it out the mistake when they face same issue. keep learning.

Doraemon @Hem sir, I am not able to download the sql file from the GitHub page, whenever I try giving download it always open the raw file but If anyone knows how to download please help me out!

@Doraemon @Hem sir, I am not able to download the sql file from the GitHub page, whenever I try giving download it always open the raw file but

Ahmed 07/03/2022 8:47 AM
I think you are talking about the YouTube power bi project series (edited)

Ahmed 07/03/2022 8:50 AM
I faced the same problem

So I went to this page:
www.github.com/codebasics/DataAnalysisProjects (edited)
Click on the green button and select Download Zip.
After downloading the file, unzip it and you'll find the db_dump.sql file inside the sales insights folder (edited)

Hope this helps

Hi Ahmed - just want to say that I appreciate your participation in the Power BI course channel. Thank you and keep up the great work!

July 8, 2022

ahm 07/08/2022 1:04 AM

Hi Hemanad. Thankyou.

I want to thank you and Dhaval for releasing such a high value course for a reasonable cost. Believe me @Hem I graduated in May 2021 and since then I have taken a gap year and tried learning data analytics from various YouTube videos and bootcamps but never gained knowledge as much as I did from this power bi course.

About Me Section

About

I am aspiring Machine Learning Enthusiastic, looking forward to solve real World Problems through My Learnings.

About

Data Analyst with a background in Industrial Engineering. Proficient knowledge of SQL, statistical concepts, Python and data analysis. Possess good analytical skills paired with curiosity and ability to interpret, analyze large amounts of data and present findings using visualization tools like Tableau & Power BI.

About

I'm Naveen, currently working as Data Analyst at Codebasics/AtliQ Technologies, and I love figuring out the story and insights from the messy data.

One Interesting fact about my job is, I got this offer based on my Linkedin profile and my submissions in the #codebasicsresumechallenge , without any formal interview 😊

I have recently switched to data analyst role form Testing Engineer. The experience from working in testing domain, helped me to become the best in identifying the hedge cases in all the scenarios.

Tools and Technologies I work.

- Power BI
- Python
- MySQL
- Excel
- Notion

My Functional Areas

- Data Visualization
- Market Analysis
- Content creation
- Social Media Handling
- Dashboarding

I strongly believe learning in Public, which is the main reason I share all my learnings and experience here in a regular basis. To learn from my learnings and experience, you can follow/Connect with me here 😊 .

Thanks for sharing an important message - this is the way forward. Smarter companies have already adopted this. Even after years of experience, I still google the syntax, solutions regularly. I made a decision to not to memorize any syntax or codes conciously. This left me with less clutter on my brain and confidence that information in internet is like my second brain - I can access any information that I want from it at will.

I need [X]..I have done [A], [B] and [C] but still face this problem [Y].

Attaching my resume [z1] and [z2] for your review

Can you please help me with the following [x1, x2, x3]

{{ Contextual Outro }}

Shazin Ashraf • 4:06 PM

Hi Hemanand, Thank you so much for your feedback on my submission of recent SQL challenge.

I want to ask you a small help from your side as well

I would highly appreciate it if you could provide me review of my resume.

I am having doubts mainly in 2 things:

- 1) Do I need to reduce the number of bullet points under project experience section. I am confused whether I am giving too much info, and will distract the reader.
- 2) Is it a good idea to attach the respective links to our linkedin posts along with each projects I have done.

Shazin Ashraf • 4:08 PM

PDF

Resume-Shazin_Ashraf.pdf

Associate - Operations Coordinator at EY | Data Analytics & Business Intelligence

1mo •

•••

Today marked my first day at EY! I am really happy to share that I have recently been hired at EY GDS for the role of Operations Coordinator.

I am grateful to say that my PowerBI projects played a very important role in helping me land this job at EY. I would like to thank many people whose content has been a great source of learning for me in my journey. First of all, in most of my posts, many of you might have seen names like [Dhaval Patel](#) and [Hemanand Vadivel](#). I cannot thank them enough for providing a wonderful course on data analytics using PowerBI. I would like to thank [Forage](#) as well for providing an amazing virtual internship opportunity. Also, the content from [Sanjay Chandra Sikakollu](#) and [Raghavan P](#) were very helpful in my analytics journey. I would also like to thank many other people, particularly [Rachwen Mosbehi](#), [Ashish Babaria](#), and [Manan Intodia](#), who were instrumental in providing me with project inspiration and ideas through their work.

During an interview, I allow a candidate to use the internet to get help on code syntax, etc. I pay attention to what exactly they search for. It helps me understand how they navigate through an abundance of information on the internet to find the necessary ingredients for accomplishing a given task. After all, that's exactly what they will be doing after they are hired!

In short: Search Skill > Memorization Skill

When you love what you do, nothing seems as burden 😊

Here is my submission for the October month [#codebasicsresumechallenge](#)

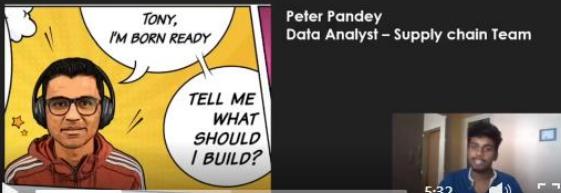

This time dataset provided by codebasics is from FMCG company's supply chain team, in which we have to track the five major key metrics.

(In terms of takes, I have reduced the count from 40+ takes in my first video to 25+ takes in this video 😊)

Obviously, talking in front of a camera is not as easy as I thought in the first. But, trying to get comfortable with that step by step. 😊

#codebasics #codebasicsresumechallenge #supplychain #alitq #products #powerbi #data #dataanalyst #dashboard #FMCG #Atliqmart #naveen_s

First of all, thank you everyone for appreciating me regarding my previous [#codebasicsresumeprojectchallenge](#) . Regarding that challenge, I have received 150 responses, messages, and doubts. I hope I have tried my best to clear your doubts. While going through those doubts, I want to share my procedure, way of thinking, and the logic behind the solution of the project.

Today morning when I opened [YouTube](#), I saw a new video uploaded by [codebasics](#), 4 Tips For Building Powerful Data Science Project. I have again fallen in love with their content. I thought it is very useful video for every data aspirant. I made this post summarizing the video. This post is dedicated to [Dhaval Patel](#) Sir, [Hemanand Vadivel](#) Sir, [Nick Singh](#)   Sir and [codebasics](#). We are very happy

I used to be a huge collector of cricket cards in my childhood and always questioned people around me on how things like average, strike rate, batting average, bowling average, etc. are calculated. I remember arguing with my elder cousin over the batting average calculation and later figured out the runs are doubled if a batsman is not out. I did these things effortlessly and found great joy when doing them. Reflecting upon this, I realize this is the reason why I ended up doing what I'm doing even though I tried so many other things before.

To all you aspirants out there trying to figure out a career, keep the curious child inside you alive all the time - somehow the kid knows what you want to do in life.

Do you also have a childhood story reflecting your career?

The image shows three vintage cricket trading cards from the 'CRICKET STAR PLAYERS' series. The cards feature portraits of Indian cricketers and their statistics. The first card is for Sachin Tendulkar, showing his career details: 143 matches, 5079 runs, 132 wickets, H. Score 137, Average 58.99, Catches 44, and Wickets 44. The second card is for Rahul Dravid, showing 19 matches, 468 runs, 105 wickets, H. Score 100, Average 25.88, Catches 29, and Wickets 27. The third card is for V. Prasad, showing 50 matches, 85 runs, 19 wickets, H. Score 18, Average 1.65, Catches 12, and Wickets 12.

Excel vs Power BI

Power BI is like an expandable collection of weapons and military equipment that could win a war. 🎁

Excel is like a mighty sword. You can train to strike with a sword in no time but a skilled swordsman could win battles with it. 🏹

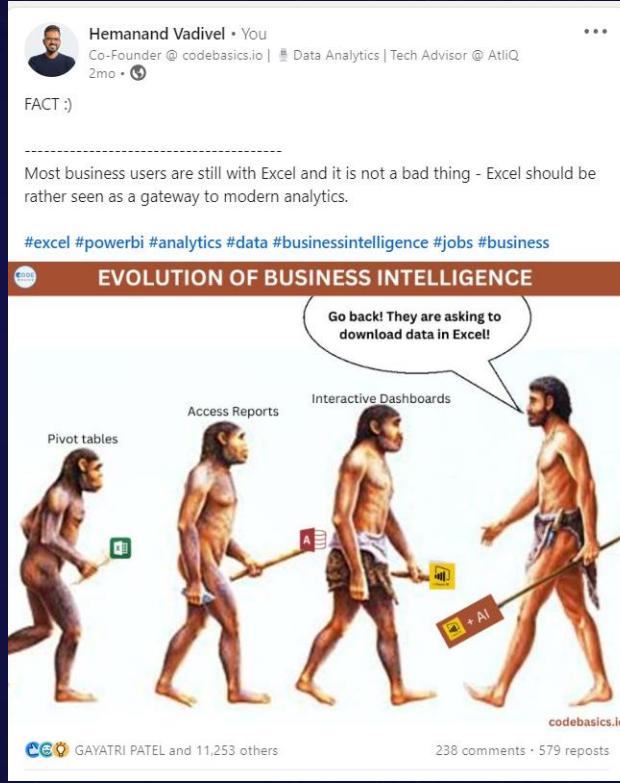

Both excel and Power BI have their own benefits with overlapping purposes - I use them together for maximum impact 💪

Let's NORMALIZE 'CAREER GAP' in 2023

A career gap does not mean a learning gap ✗

[...see more](#)

It happens due to genuine reasons such as job search, maternity, bereavement, etc.

and one still learns a lot during this period which can be used at work

great job by LinkedIn in providing a feature to add this. I have added mine 🙌

While hiring, I commit to consider and value the learnings made during the career gap.

Who is with me? 🤝

Hello Sir,

I got a final placement at my college as a Jr.Data Analyst. They were impressed by my project which I did in the resume challenge.

Thanks a lot...!!!!

Hemanand Vadivel • 9:27 PM

Wow! I'm glad to hear that and I'm sure you will make it big in this field!

Congrats and all the best!
